

DPVC Inc. Announces Investment Strategy

June 24, 2010. DPVC Inc. (TSX Venture: DPV) ("DPVC"), a company listed on the TSX Venture Exchange (the "Exchange"), announces its high level Investment Strategy.

The investment strategy of DPVC is to:

- Create a portfolio of real estate assets in the United States where long term value is maximized through the acquisition of well-positioned, under-valued or under-performing stabilized assets;
- Create value through the further development of an underperforming asset to hold for its rental income or to sell to a third party;
- Be opportunistic in approach in viewing real estate assets for purchase. Invest and purchase where expertise can be maximized and where management can make a difference by creating value in difficult situations or in value-added refurbishment programs;
- Be selective and focused on purchasing assets in geographic areas where management has known infrastructure "on the ground". This means that likely geographic areas include Nevada, Southern California, Oregon, Washington State, Arizona, Utah and Colorado;
- Be selective and focused on purchasing assets that are for residential, commercial, retail or industrial uses;
- Use the combined contact base (the "network") of management and its partners to purchase "stressed" assets from banks, private lenders and brokers prior to these assets being offered at auction or generally to the public;
- Distribute cash received from the assets purchased when it is available and under conservative assumptions.

The TSX Venture Exchange Inc. does not accept responsibility for the adequacy or accuracy of this release.
